

You don't have to be an expert to produce high quality images for the Internet. Win-Studio does it for you

Win-Studio

An integrated desktop photo studio

Using advanced sophisticated algorithms, Win-Studio lets you set up a photo shoot, adjust illumination and lighting settings, and perform post-processing of images, quickly and connecting to any computer or network port, Win-Studio is simple to install and operate. All you need to produce sharp, high-detailed, Internet images is included in a small space-saving unit.

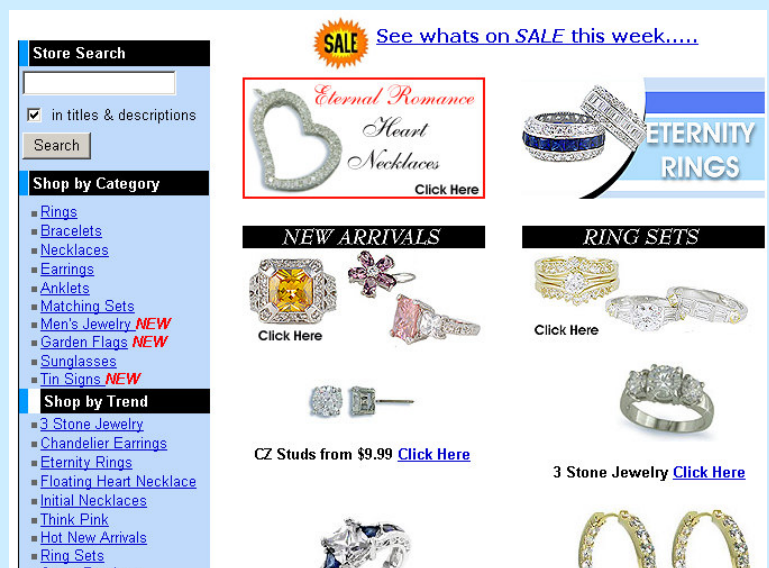

How does Win-Studio work?

Simply place the object you want to photograph on a stand on the rotating stage within the photo unit.

The unit shields the object from external light.

Close the unit's cover and activate the Win-Studio software to adjust the camera's focus and illumination settings.

Once you're satisfied with the image, you're done. It's as easy as that.

Features

- Creates Internet-ready images quickly and easily.
- Connects to your office network.
- Lets you control positioning, lighting and focus settings via your computer.
